

# Water Resources:

Rain and Snow to store in ground (for ground water) and in the hills for a continuum of supply to Rivers and Streams, and Springs.

How could we improve this process?

Rivers for transport and for Fall of Water for Power Parks for enjoyment & fishing.

Could we improve transportation, Could we take more advantage of water falls for power productions. How about develop private parks along the Rivers

Springs of Wasatch Co. must be located, identified, registered, and each one needs to be improved

We must preserve our Springs!  
Could we improve each Spring?  
" " develop our warm Springs?

a. Cold Springs

b. Warm Springs

Lakes and Reservoirs must be surveyed, monitored, and bolstered when & where necessary

How can we improve each Storage unit?  
Could we build more parks on their edges (like on Deer Creek)?

Wells <sup>hand dug</sup> ~~Drilled~~ must be identified, registered, monitored & improved.

Water Resources:  
warm in stream  
(water) and in the hills  
arm of supply to River  
and springs.

See  
Linda  
Pritchett  
about  
Springs.

Warm Springs  
Cold Springs  
improved  
and each one needs to be  
identified, registered,  
Springs of Watch Co. must be  
park for enjoyment of fishing.  
Fall of water for power  
transport and for

registered, monitored & improved.  
Volls - drilled & identified,  
when & where necessary  
surveyed, monitored, and bolstered
